

JOB OFFER

Project Engineer Sr.

Your mission: Lead the design of high-pressure/high-temperature equipment and the process scale-up. Coordinate activities with the R&D team and lead risk assessments.

About yourself: With an entrepreneur mindset, you enjoy challenging environments. You have 10 years practice of project engineering in the chemical, energy, or similar sector. You have a Master or PhD in Process/Mechanical Engineering.

We are offering: The opportunity to join a company with a high development potential. Integrate a young, dynamic, and very motivated management team and lead multiple activities.

TreaTech is a Swiss startup funded in 2015 by EPFL engineers. The company's objective is to commercialize a solution for the disposal and valorization of wet / liquid waste such as sewage sludge, digestate from methanization, or other industrial sludge. The company is based in Lausanne (VD) and will focus for the next 2 years on the development of a pilot unit at a customer's site.
